## Book Review Rocky River 'Riters

The English Patient by Michael Ondaatje

The story is set in 1945 with Germans retreating. World War 2 has just ended and the story starts with Hana, a young nurse, gardening outside a villa in Italy in 1945. The Germans are retreating throughout the Italian countryside, the nurses and patients have left the villa to escape to a safer place with Hana deciding to stay in the villa with the last patient. Hana knows little of the patient and assumes that he is English through her observing his mannerisms.

This intriguing story weaves through four different characters, Hana the nurse, Kip the Indian Sapper, Caravaggio the thief and the English patient, who has no name or identity, all of whom are wounded in different ways. Little by little the English patient tells his story. Is there a possibility that he is not English after all? Each character is intertwined with his story which links them from the past to the present.

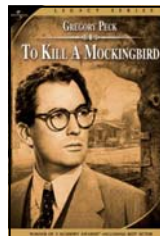

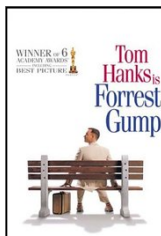

This Booker prize-winning book explores World War 2 from a different perspective and with the use of characters who have hidden backgrounds, the book successfully delves into personalities and personal issues drawing the reader into the tale.

Well worth a read. This novel was adapted to film in 1996 and is considered in the Top 50 'Book-to-Movie' adaptations.
