

Plan indicating Existing shade and proposed timber bench and shade

1

Natural Timber Bench - simple half cut logs used as seated benches

2

Mound Tunnel - challenge your agility and balance by scaling the log and rock steppers to gain a vantage point atop the mound or scurry and hide below in the cave

3

Low Level Log Steppers- low logs challenging your balance and agility, can also double up as informal seating

4

Mound Slide - slide attached atop of the mound used to quickly manoeuvre down

5

Tumble Bar - a combination of gross motor skills that focus on upper body and core strength

6

Log Scramble - random assortment of logs that encourages climbing, problem solving and risk taking

7

Monkey Bars - spaced at random angles and varying heights for tumbling and hanging, a great way to develop grip and upper body strength

8

Double Bay Swing - learn about sharing and cooperative play, stimulates awareness of body in motion

9

Timber Ramp - a sloping surface used to easily access the top of the mound

10

Garden Bed - for growing a variety of sensory plants

11

Slope Rock Wall - alludes itself to climbing and balancing activities

12

Timber Bench - bench used for relaxation, eating & picnics underneath the shade
