

# Community Power Network

## Information Seminars

**Join us for a casual and informative session about Community Power Network and the benefits of the program for the Port Pirie Regional Council Community.**

Community Power Network protects Australians from escalating electricity prices by providing the power of bulk purchasing for world-class solar and battery storage technologies. Ultimately, Community Power Network creates a distributed or virtual 'power station' across whole communities to future-proof individuals as well as the network infrastructure, enabling energy to become far cheaper and more reliable.
